LabPulse Medical
PreSolve
XYLENE FREE
TISSUE PROCESSING
CLEARING REAGENT
EXCELLENT FOR THICK
FATTY TISSUE SPECIMENS

Clearing Agent for Processing

PreSolve can be used on traditional, closed tissue processors (such as the Excelsior)

And on microwave tissue processors (such as the EBS LP2850 and Tissue Wave 2)

This Excellent Xylene substitute allows various fixatives and dehydrants to be used for tissue processing prior to clearing with PreSolve.
